

## GRODNO WP4 Workshop

### Concepts for EER of buildings and the modernization of the supply infrastructure in the target areas

Grodno/Lida, 17 and 18 November 2010

#### Objective of the Workshop

The workshop in Grodno has the following objectives and content:

- Portrayal of the general conditions in Belarus as regards energy efficiency in residential buildings and the existing approaches to promote the revitalisation of buildings and urban areas.
- Presentation of the analyses on energy efficiency for selected building within urban development concept in Lida.
- Visit of the target area in Lida.
- Study visit to practice examples for energy efficient refurbishment of buildings and/or approaches for use of renewable energy sources for energy supply of neighbourhoods in Grodno and/or Lida
- Partner workshop where the target areas' concepts for EER projects with investments in buildings and the supply infrastructure are presented and discussed. The workshop also focuses on the issues “renewable energy”, “financing schemes for EER”, “involvement of energy supply companies” and participation of stakeholders and residents.

#### Venue of the event

The workshop takes place in Lida (17 November 2010) and in Grodno (18 November 2010).

#### 16 November 2010
