

Consultation process of the target areas

State of the TA of Rakvere

Raul Järg
Rakvere City Government

03 March 2011 – WP5 workshop in Piaseczno

Support Programs

- **Regional/local support programs – no special programmes but Municipality of Rakvere is supporting compilation of energy audits through UrbEnergy project**
- **National support programs and measures:**
 - **EE and RE support program provided by Estonian Climate and Energy Agency - supporting the compilation of construction documents. Amount up to 90%**
- **International support programs:**
 - **EE and RE support program provided by KredEx – supporting compilation of energy audits, construction documents, construction process supervision. Amount up to 50%**

- **EE and RE programs provided by KredEx supporting renovation of the apartment buildings. Amount up to 35%**
- **EE and RE UrbEnergy – 85% of the costs provided by the programme Baltic Sea Programme 2007-2013**

Practical Experience in TA

- **Through implementation of UrbEnergy project, Rakvere is aiming to promote the usage of KredEx support programmes among residents in order to achieve EE and RE in renovation of existing housing stock**

Funding resources

- **Funds contain resources from:**
 - **selling CO2 quotes**
 - **EU structural funding**
 - **State funding**
 - **Municipal funding (self-financing part of UrbEnergy project)**

Possible improvement and demand

- Experiences: Low interest by residents, intimidated by the loan
- Possible improvements – the current terms are too complicated for the end beneficiaries
- Promotion through public media has to continue, the achievement of positive results take time among end beneficiaries
- New and continuous funding necessary since the housing stock needs huge refurbishments. However, residents need to be convinced. **Realized best practises important work in this**
